Are you the parent of a child aged 2-12?

We want to hear from you!

Parents of young children work hard to keep them safe, secure, happy and healthy. Although it’s rewarding, parenting isn’t an easy job. In fact, many people say it’s the most challenging job ever! Parents may need support at different times and in different ways – but unfortunately, the support some parents need may not be available in the form that makes the most sense and works best for them.

The International Parenting Survey – Canada (IPS-C) is a project with the potential to change that! By participating in a confidential on-line survey, parents of children ages 2 – 12 will have a voice in the services they need and want. It asks parents about their children’s behaviour, about their confidence in responding to problems their children experience, and about the supports that are available in their community.

The survey takes about 20 minutes to complete and is only available online until June 30. If at least 100 parents living in Simcoe Muskoka take part in the survey, researchers from the University of Ottawa will provide data that will help local service providers design supports that match parents’ needs and preferences.

Please help bring to light what parents in Simcoe Muskoka want and need.

Tell people about the survey – colleagues, clients, neighbours, friends and family members. And if you are a parent of a child aged 2-12, have your say by taking part in the survey at www.ips-canada.net.
